

ADVANTAGES OF SLIMMKER AND COMPARISON WITH OTHER MATERIALS

SlimmKer

1. ADVANTAGES OF SLIMMKER

Recyclable and environmentally friendly: INALCO's H₂O IPLUS FULL DIGITAL technology uses water-based inks and glazes that are environmentally friendlier and more sustainable. INALCO also recycles all the cardboard, plastic and metal that it uses, in addition to wastewater from the production process. INALCO products are fully recyclable.

Lightweight: Thanks to its 6mm slimline thickness, SLIMMKER is a lightweight material that is easy to handle and transport.

Resistant to wear: All INALCO products are highly resistant to impacts, thermal shocks and ultraviolet rays. They are resistant to abrasion and unaffected by the passage of time, conserving their initial appearance.

Resistant to frost and ice: SLIMMKER's low water absorption rate of less than 0.1% makes these products ideal for outdoor environments subject to frost and ice.

Resistant to ultraviolet rays: The surfaces of SLIMMKER are colourfast, even when used outdoors.

Easy to clean and care for: No extra care or special products are needed to clean them. Stains can be removed with water or normal cleaning products.

Stain resistant: SLIMMKER is not affected by products like solvents, detergents, bleach, oil, vinegar or citrus juice, provided that the stains are cleaned away within 24 hours.

Hygienic: Because they have a non-porous surface, this prevents the build-up of bacteria or mould, allowing for direct contact with food products.

Impact resistant: SLIMMKER is resistant to knocks and impacts by everyday objects or utensils. (Everyday objects found in kitchens, restaurants, laboratories etc.).

Bending strength: It can withstand a high weight without bending or becoming deformed, maintaining its entire surface flatness.

Scratch resistant: Food can be cut directly on top of the surface without it being damaged. Even so, ceramic cutting boards, such as SLIMMKER GASTRO by INALCO, or boards made of other materials should be used.

Impervious: Fully impervious vitrified surface.
