### NON-SLIP PRODUCTS

STYLE-**in**

 **inalco**

INALCO's wide range of non-slip products combines design appeal with the high technical performance required for more demanding projects.

Their outstanding technical characteristics include a high resistance, capacity to withstand sharp temperature changes, and almost nil water absorption, making them ideal for use in wet areas and outdoor ones, like terraces, exterior staircases and swimming pools, among others.

The collections are also conspicuous for their elegant modern designs, allowing for seamless continuity between indoor and outdoor spaces: a much sought-after characteristic by professionals, who highlight the added value of INALCO's products.

INALCO's non-slip floor surfaces comply with the slip resistance safety requirements of leading international standards.

NON-SLIP PRODUCT: CLASS 3 - R12 - A+B+C

NON-SLIP PRODUCT: CLASS 3 - R12 - A+B+C

ANANDA  
Blanco

MASAI  
Blanco Plus

PACIFIC  
Blanco Plus

PETRA  
Crema

JASPER  
Moka
